

## Homewood Location – Renovation

*In the flagship Homewood location, The Center needs renovations and a more efficient and effective layout to deliver programming. With strategic investments in Homewood, The Center’s flagship home location will continue to serve those struggling with cancer for another quarter of a century.*

### Renovations Required:

As the flagship home for The Center for nearly 20 years now, there are critical and basic repairs that must be made as well as some facility enhancements in order to better serve our participants. These are not the “exciting” improvements, but they are absolutely critical to continue to serve the thousands of people we do each year.

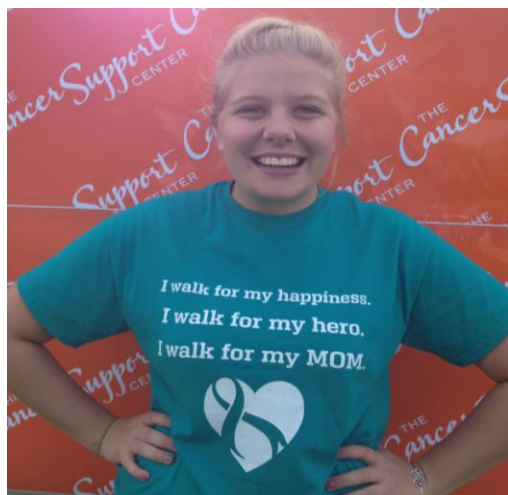

Some of the renovations include: a new tear-off replacement roof; replacement of a 25 plus year old furnace; tuck-point the building to seal it from moisture; front entry to building more welcoming and handicapped accessible; update bathrooms to accommodate wheelchairs and walkers; laminate flooring to eliminate allergens from rugs.

As we look forward to the next 25 years, we want our facilities to be ready to serve those in need.

### Facility Improvements:

With some strategic changes in the layout of the facility, the amount of programming that can be offered can be increased substantially while also creating more confidential and centering spaces. Some of the highlights of our proposed facility improvements include – a new fitness room for ongoing movement activities for wellness and healing; a dedicated nutrition area where participants can easily access information and learn how to use food as a weapon against cancer; a quiet living room area for those who respite from the storm of cancer; a welcoming reception area that immediately greets new people & improves confidentiality; a suite of therapist offices with an easy exit after a difficult session; a larger wig and massage room to provider greater comfort to participants and their loves ones; and much more.

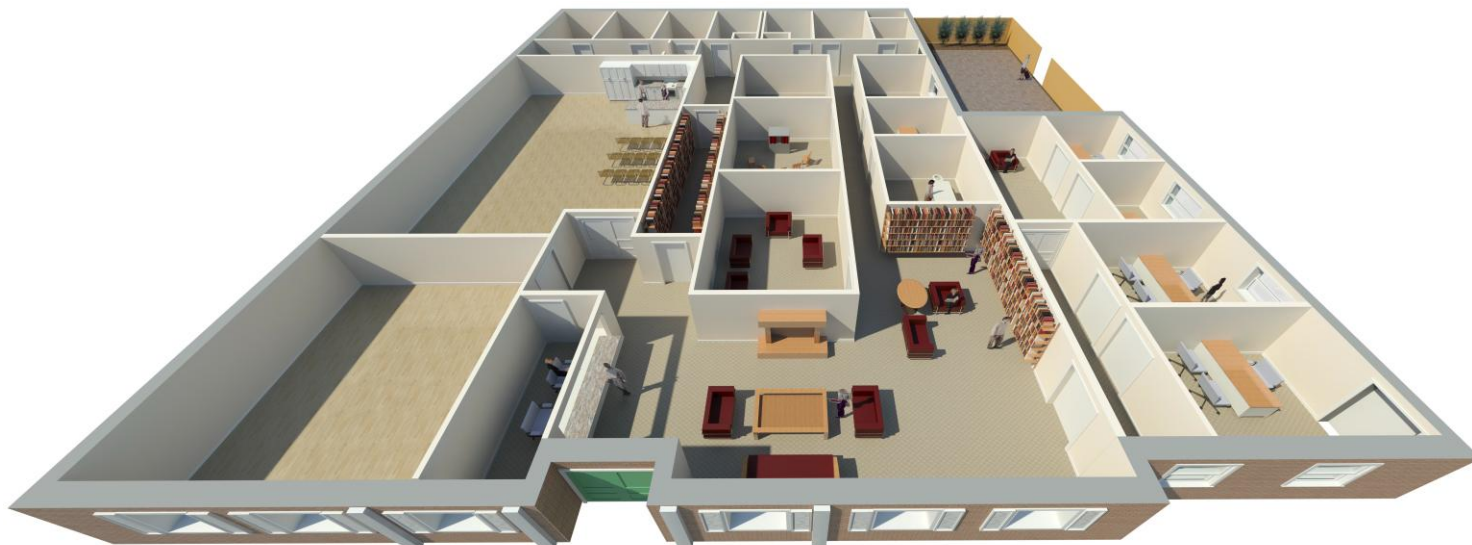

## Dare to Dream of a Beautiful Space Where Help, Hope and Healing Happen Every Day!

Please help us accomplish these goals with a gift to this Capital Campaign, *Building Today to Change Lives Tomorrow!* With these outlined improvements, The Center can continue to provide critical supports to those who are on the cancer journey and do so in facilities that are up to date, safe, and aligned with newer standards of wellness & supportive care.
