

Mokena Location – New Facility

With the support of a Foundation, The Cancer Support Center purchased a new facility in Mokena on LaGrange Road, directly west of its current location. This condo unit is three times the space of our current location. With this additional space, The Center can expand its programs to fully meet the needs of our cancer survivors and their loved ones in that geographic area. This new space is a blank canvas that will require financial resources to build out. We hope you can help us!

Supportive Program Needs:

With only 4 private spaces in Mokena currently, this new space will allow us to create a range of supportive care options that we just cannot have now. In the new space, there will be a dedicated area with three therapist offices, including one larger for small groups or families. A library room will provide a quiet private space to find information & meet fellow participants looking for answers to difficult questions. With a large Great Room, more support groups can occur throughout the day to bring comfort to many.

For our youngest participants, we will have a Kid’s Room uniquely designed for them so they have a comforting place as they manage their emotions.

Wellness Programs including Fitness & Nutrition:

With this new space, The Center will be able to have a large general space like the Great Room in Homewood to provide comprehensive wellness programs including nutrition and cooking classes as well as gentle fitness classes such yoga, Moves that matter, and more.

In addition, The Center can have a permanent wig and massage therapy room in order to expand these program options. Right now, the wig room is part of a small support group room limiting our ability to meet the demand for wigs.

This new space will have a dedicated nutrition room where participants can either drop in or meet with our nutrition educator to learn more about what foods are most beneficial for healing support and reducing side effects of cancer

Let’s Walk This Journey Together!

New Larger Permanent Space to Put Down Roots!

Help us as we look to build out this new space so that we can provide comprehensive wellness and supportive care to those on the cancer journey. With ever increasing demand for our services, this new space is absolutely essential.

Be the difference by donating today so we can build out the following spaces:

- Great room with kitchen
- Nutrition room with information & posters
- Library and small group room, private
- Kids room with therapeutic activities

Mokena New Layout!

Capital Campaign – Mokena

This rendering of the new Mokena space for The Cancer Support Center demonstrates the interior renovations, which will enhance and improve The Center’s ability to meet the steadily increasing demand for our services and survivorship programming which continues to grow according to the medical community.

Help us build this space out so that more people in Chicago’s Southland are able to access high quality supportive and wellness cancer care – always free of charge.

Together, we can be the difference in the life of someone struggling from this hideous disease.
